The Lawson
AUTO-COAT/SEMI

Adjustable Frame Holder

Support Rails w/ Roller-Bearing Glide System

A Coat of Consistency

The Lawson Auto-Coat/Semi Emulsion Coater is an easy-to-use semi-automatic emulsion coater. This semi-automatic screen coater assures greater emulsion consistency – side-to-side and front-to-back. Every screen will be coated exactly to your preference.

Ultra-glide smooth travel, variable-frequency motor control and precise machining ensures perfect emulsion consistency on every screen coating. An intuitive control panel allows the operator to turn the unit On/Off, select the coating speed and operate the unit with a foot pedal. The starting and ending screen position is adjustable for the best ergonomics.

The Lawson Auto-Coat/Semi is designed for quick set-up, easy use, minimal maintenance and affordability – so even the smaller shop can gain the benefit of precise coating control.

ST. LOUIS | ATLANTA | NATIONWIDE
