6-Color, 4-Station

Heavy Duty Output For Manual Printing

The Lawson HD-Max manual screen printing press is an industry winner. For over 25 years, the HD-Max has been providing printers who are serious about printing with simplicity and superior reliability.

A CNC machined, pure steel center shaft, core and deck plate guarantee a lifetime of service. Forget about maintenance and registration issues and focus on maximum output. Extra Long Side Screen Clamps, Roller-Bearing Registration Gates, Micro-Registration, Platen Support Arms, a Wide-Stable Base and many more features make the HD-MAX the most reliable and accurate press in the screen printing industry.

- Max Screen Width = 25"
- Limited 5-Year Parts Warranty
- **24/7/365 Technical Support for Life**

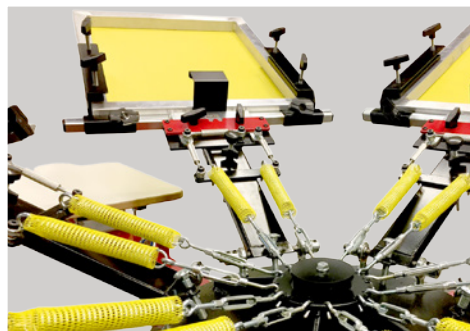

ST. LOUIS | ATLANTA | NATIONWIDE

THE LAWSON HD-MAX PROVIDES:

- ✓ **Guaranteed Perfect Print-to-Print Registration** with Lawson's "micro-fit" roller bearing registration system. Eccentric roller bearings glide into hardened, precision machined shafts for perfect registration every time.
- ✓ **Micro-Registration** for precise registration on all of your screens.
- ✓ **Modular Design** allows the HD-Max to expand print heads and stations at any time even in your shop.
- ✓ **Adjustable Off-Contact System** that is adjustable even after the screen is "locked down" and registered.
- ✓ **Comfortable for everyday printing** with easy-glide rotation, squeegee rest stops, adjustable-height platens and a solid 1.5" diameter rotation shaft with never-wear, taper-roller bearings throughout.
- ✓ **Ships Fully Assembled** with no tech install required.
- ✓ **Lawson's platens and slip tubes are easily adjusted** for perfect leveling and off contact. Multiple platens are available and can be quickly switched on the press. Level your platens at any time for special printing requirements. Print with no (or minimal) platen deflection!
- ✓ **To add even more production and shop capability,** Lawson built more versatility into the HD-Max. We feature adjustable spring tension for various size and weight screens, variable screen angle and off-contact.
- ✓ **Dual "never-wear" springs** are provided on each color head. Micro-tension adjustments are provided on each individual spring. This ensures perfect frame balancing for effortless lowering and raising of either large or small screens.
- ✓ **The Lawson HD-Max Series is a massive, ruggedly built** piece of industrial machinery. You'll never worry about maintenance again with the optional \$199 lifetime parts warranty.
- ✓ **Lawson's exclusive locking detent** provides for easy relocation of the speed carousel. It's standard on all units. Detent pressure, for locking in the carousel, is adjustable.

OPTIONAL FEATURES

- Aluminum Platens
- Pin/3-point Registration
- Specialty Platens & Custom Platens
- All Heads Down
- Jacket Attachment
- Cap Attachment
- Rear Clamps
