The Lawson
PRO-CURE

Mesh Screen Dryer System

Increase Your Turnaround Time

DESCRIPTION

To ensure a clean and properly dried screen, or to dramatically increase your screen-making production, the Lawson Pro-Cure is ideal. This thermo-air screen dryer accelerates screen drying by passing temperature-controlled air over and under your screens. The warm air is in constant motion to dry your processed or newly washed screens evenly and rapidly. The Pro-Cure has all the features you need for a quality screen-making operation.

In addition to temperature-controlled air movement, the Pro-Cure filters all fresh intake air prior to heating and distribution. The self-winding timer is easy to set and will automatically turn off upon completion of the drying cycle. All interior shelves are adjustable to accommodate various-sized screens.

Standard Sizes:

- 28" x 31" (O.D. = 38 1/2" wide x 34" deep x 23" high)
- 30" x 46" (special order)
- 46" x 48" (special order)

Optional Roll-In Screen Cabinet (not pictured) is made for larger volume production (holds 20 screens)

ST. LOUIS | ATLANTA | NATIONWIDE
